

Security procedures that restrict easy access to cross-Puget Sound public ferry traffic will give terrorists and dictators victory over sensible freedom-loving people. Unsecured ferry traffic is an acceptable risk and far preferable to the uncertainty, delays and inconvenience of searches and screening. Procedures that limit my freedom to travel will have negative effects on our economy and our way of life. I need to predict the time of my commute or my business suffers, my family suffers. Guard our borders and leave us alone!
